

ENVIRONMENTAL AND SUSTAINABILITY POLICY

Casna is committed to conducting its activities and operations to reflect best environmental practice in its business activities in order to reduce its impact on the environment. In order to achieve this, Casna aims to:

- conduct its activities in order to comply with the requirements of applicable environmental legislation;
 - integrate environmental considerations and objectives into the company's business decisions;
 - minimise consumption of natural resources, including energy, as far as is economically practicable;
 - prevent pollution and minimise emissions;
 - reduce the production of waste and develop effective recycling procedures;
 - encourage all employees to use walking, cycling and public transport for travelling to and from work as an alternative to using a car;
 - establish environmental objectives and targets and monitor and measure performance against these targets;
 - raise awareness of environmental issues through training and employee communication;
 - through the company website and general communication, make existing and prospective clients aware of Casna's commitment to the environment
- and
- inform all Casna suppliers of goods and services of the company's commitment to best environmental practice and take into account environmental credentials when selecting new suppliers.

Each employee is individually responsible for his/her adherence to the principles of this policy and must ensure that the environmental management system is maintained, reviewed and improved when appropriate.

Continual Improvement

Regular reviews of the environmental system are carried out together with regular audits to ensure that the system is continually improved and the highest standards are maintained.

Nick Appell
Managing Director
